(Project Title)

#### GENERAL

Installation shall be in accordance with an approved design and plan. Details of construction shown on the drawings but not included herein are considered as a part of this specification. Construction activities shall be in accordance with applicable OSHA regulations. Construction operations shall be completed in a manner that soil erosion and water and air pollution are minimized.

#### FOUNDATION PREPARATION

The foundation area for all road pads including shoulders and borrow ditches shall be cleared and stripped of all brush, roots, sod, large rock or other material not suited for making a compacted road fill, unless otherwise noted on the drawings.

All unsuitable materials shall be excavated from the roadbed areas and the void replaced with approved compacted fill material before the placement of the road subbase and surfacing materials.

#### SUBBASE PREPARATION

The road base shall be graded to the required elevations. In areas requiring fill, the materials shall be compacted as noted on the drawings or specified in the ADDITIONAL SPECIFICATIONS. As a minimum the entire surface of the final subgrade shall be traversed by not less than one pass of loaded hauling equipment.

#### DRAINAGE

Ditches, culverts or other structures shall be of the type, size and materials and be installed to the lines and grades as shown on the drawings. Corrugated metal pipe for culverts shall meet the requirements of Wyoming Construction Specification WY-430II, unless otherwise specified.

Backfilling around culverts, abutments and other structures shall be accomplished by means of hand tamping, manually directed power tampers or hand directed vibratory plate tampers. The backfill material(s) shall be of the type and compacted density as specified on the drawings.

#### SUBBASE MATERIALS

Subbase materials when specified shall be of the type, compacted thickness and be placed to the cross section shown on the drawings.

#### SURFACING MATERIALS

The final road surfacing shall be of the materials, thickness and to the cross section as shown on the drawings or as listed in the ADDITIONAL SPECIFICATIONS.

Where shown on the drawings seeding, mulching, etc. shall be installed or applied.

#### ADDITIONAL SPECIFICATIONS
